

RANJITH R

Data Scientist (Fresher)

☎ +91-7558114803 ✉ ranjithr3504@gmail.com [🌐 LinkedIn](#) [🌐 Ranjith-Portfolio](#)

Summary

Aspiring Data Scientist with a strong academic background in Data Science and Computer Science. Skilled in Python, SQL, machine learning, data preprocessing, statistical analysis, and data visualization. Experienced in working with datasets to identify patterns, build predictive models, and generate meaningful insights. Passionate about leveraging data-driven approaches to solve real-world problems and support business decision-making. A quick learner with strong analytical and problem-solving abilities, eager to contribute to innovative data science projects and grow in a collaborative environment.

Education

M.Sc. Data Science <i>Vellore Institute of Technology, Vellore</i>	2024 – 2026 <i>CGPA: 8.29 / 10</i>
B.Sc. Computer Science <i>Vellore Institute of Technology, Vellore</i>	2021 – 2024 <i>CGPA: 8.35 / 10</i>

Skills

Programming: SQL, Python(TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy), C, Arduino
Data Science & Visualization: Power BI, Tableau, MS Excel, Exploratory Data Analysis (EDA)
Deep Learning: ANN, CNN, GAN
Database Skills: MySQL, NOSQL, Database Design
Other Technical Skills: Git, IoT (Sensors, Arduino), Problem Solving

Projects

IoT Fire Fighting Robot <i>Arduino, IoT, Embedded Systems</i>	Jan 2024 – Mar 2024
– Developed an IoT-based robot using flame, gas, and ultrasonic sensors for autonomous fire detection, obstacle avoidance, and emergency alerts. – Integrated GSM communication and an automated water-spraying mechanism for real-time fire response.	
Lung Cancer Prediction using VGG16 <i>Python, TensorFlow, Deep Learning</i>	Aug 2024 – Jan 2025
– Built a VGG16 transfer learning model to classify lung histopathology images into multiple cancer categories. – Applied image preprocessing, augmentation, and evaluated performance using Accuracy, Precision, Recall, and F1-Score.	
Human Face Generation using DCGAN <i>Python, PyTorch, GANs</i>	Jun 2025 – Nov 2025
– Implemented a DCGAN model to generate realistic human face images from random noise using the CelebA dataset. – Improved image quality through hyperparameter tuning and adversarial training optimization.	
Real vs AI-Generated Face Detection <i>Python, TensorFlow, CNN</i>	Dec 2025 – May 2026
– Developed a CNN model to classify real and AI-generated faces using transfer learning techniques. – Enhanced model interpretability using Grad-CAM while achieving high classification performance.	

Awards & Certifications

- **2nd Place – IoT Fire Fighting Robot Project (Apr 2024):** Secured 2nd place in the departmental project competition at VIT for developing an IoT-based fire detection and extinguishing robot.
- **Oracle Certified Professional – OCI 2025 Certified Data Science Professional (Sep 2025):** Achieved Oracle certification in Data Science under Oracle Cloud Infrastructure 2025 program.
- **Infosys Springboard – Database Management System (June 2025):** Completed training in database concepts, schema design, and SQL queries.
- **LearnQuest – Introduction to Python Scripting for DevOps (Feb 2023):** Completed foundational course on Python scripting concepts, authorized by Coursera.
